Press release

Rotterdam, the Netherlands, June 1st 2011

Be Smart, Think Green choose **Nature**

With great pleasure we can announce the global expansion of the maritime service providers “International Slop Disposal” and “Ecoscrub Solutions”

Both companies have been taken over by London AIM Market listed company Nature Group PLC, of which Port Invest (former owner of both companies) has become the largest shareholder.

The slop collection and vapour treatment activities are expanded to the ports of Gibraltar and Stavanger. In the coming years new locations will be opened with a focus on the strategic located ports in Panama, Houston, Singapore and the Middle East. Nevertheless, your local contact persons will remain the same and the provided maritime service level will keep the well known high standards.

Nature Group combines its port reception services and facilities, offshore treatment services and the latest sustainable waste treatment technologies in a continuous expanding global network. Each location will provide you with Nature's high service, transparent way of doing business and environmental responsible treatment of your maritime waste.

Nature Group combined with ISD and Ecoscrub Solutions

Integrating the individual maritime activities resulted into a combined waste oil collection fleet of 15 barges and coasters. In 2010 a total of 350.000 m3 of oil- and chemical waste has been collected.

We are a company with more than 25 years of experience in waste treatment and an unique Corporate Social Responsibility (CSR) strategy that enables us to be truly a part of Nature.
